

PLANTER BOX MIX

PRODUCT CODE - ESPBM

FAST FACTS

- ← Enhances plant growth
- ← Increased water holding capacity but maintains good drainage
- ← Suitable for use in specially designed garden areas and with geotextile liners

PRODUCT SPECIFICATIONS

- ← Saturated bulk density >1.55kg/L
- ← Particle size distribution: 8 to 12% passing 75µm
- ← Plant available water: > 8%
- ← Soil texture: sandy loam
- ← Organic matter content: 3 - 6% dry weight

APPLICATION

- ← Use in planters where good soil structure that resists compaction and slumping is needed, no maximum saturated bulk density is specified and lower water use is desired.

HOW TO USE

1. Ensure planter can adequately drain
2. Apply planter box mix to depth of planter
3. Do not compact
4. Add a good slow release fertilizer
5. Plant out as required and top with a long lasting mulch
