

DEEP TREE SOIL MIX

(FOR USE WITH STRATAVAULTS FOR LARGE TREE PLANTING)

PRODUCT CODE - ESDTSM

FAST FACTS

- ← Contains added trace elements that are typically deficient in Swan Coastal Plain soils.
- ← Used for large tree planting (including StrataVault installations).
- ← Ideal for use in Deep Rootzone Planting Media (as per State Planning Policy 7.3, Residential Design Codes, Volume 2, Apartments, May 2019).

PRODUCT SPECIFICATIONS

- ← Particle Size Distribution- 8 to 12% passing 75 microns
- ← Plant Available Water: Greater than (>) 8%
- ← Soil Texture: Sandy Loam
- ← Organic Matter Content: 3 to 6%

APPLICATION

Use to fill StataVault for large tree planting in Deep Rootzone Soil applications. Best where a well drained, sandy loam textured soil with well balanced micro nutrients are required.

HOW TO USE

1. Ensure large tree pit or StrataVault will adequately drain.
2. Apply deep rootzone soil to base of excavation.
3. Compact only lightly to ensure a stable base and to avoid soil subsidence.
4. Install root ball to appropriate height.
5. Backfill with deep rootzone soil.
6. Top with long lasting Aquamor™ Mulch.
